Forecast for Thursday 02 Feb 2023

Weather: Mainly dry with some limited drizzly outbreaks, chiefly on west facing slopes. Cloud will be quite extensive with best of the limited brighter spells appearing across eastern areas of the Park.

Chance of cloud-free hill tops above 600m: 30% early and late, but 70% for the early afternoon.

Low cloud and visibility: Periods of cloud are expected above 500-600m, although the cloud base may briefly rise around the middle of the day before lowering again late afternoon. Visibility will be mostly good, but poor in drizzle perhaps a couple of kilometres, and very poor in cloud down to around 100m.

Freezing Level*	1400m	1300m	1300m	1300m	1300m	1300m	1400m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Wind speeds may gust up to 40-50mph over higher summits and exposed ridges, especially during the evening. This will give difficult walking conditions with a risk of being blown off balance. Be prepared for sudden wind increases on lee slopes.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
